

Machine Top Vacuum Paddle

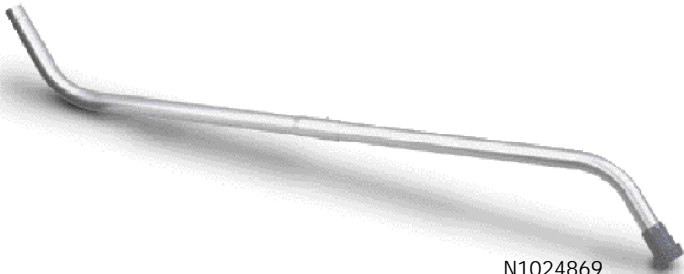

Clear the dust and dirt from the tops of equipment and machines with the Machine Top Vacuum Paddle. With a 12" x 4 1/2"-3 1/2" tapered head, the attachment easily cleans a large area in quick fashion. It attaches to 1 1/2" hose ends to accommodate most vacuums. Make reaching the tops of machines even easier with the aluminum wand. Made from two pieces of solid aluminum tubing, the wand breaks down for storage when not in use. An attaching end solidly holds the vacuum paddle in place. Unit measures 55" overall length when assembled with a 1 1/2" inner diameter.
